

Foster Quality and Environmental Policy

Foster is committed to our customers' success by providing innovative technology and manufacturing solutions that meet or exceed customers' expectations and regulatory requirements, and to deliver products and services of superior quality. We fulfill this commitment by:

- Maintaining our quality leadership in the development, manufacturing, and distribution of critical polymer products and compounds.
- Providing our customers with defect-free, cost effective, and highly engineered materials in a timely manner.
- Protecting the environment through pollution prevention and natural resource conservation.
- Ensuring the continual, proactive improvement of quality and environmental management system processes.
- Providing leadership that promotes, recognizes, and rewards excellence in quality and sustainability.
